**SLAM WEB**

*The new PC based SLAM WEB scales are specially designed to catch customers' attention and enhance the quality of the products through pictures or video.*

PC Based

**AS version** is a must in any self-service department. A wide 15" display, the *touch-screen* technology, a huge number of pictures allows the very best selection of the item to be weighed. Sticky labels can also be customized with graphics and pictures of the selected products. The size of each key is programmable.

□ **OMEGA** bilance

**CS version** is the best choice in traditional sales departments and in pre-packaging departments as well. Thanks to its compact design it's specially targeted to semi-supported sales departments (i.e. fruit and vegetable department). The keyboard allows to store weighing data and to quickly print receipts and/or labels. 42 keys allow a connection with the most used PLU and the identification of the operator.

PC Based

□ **OMEGA** bilance

**CSP version** is the ideal scale for particular location such as fish shops and all "no-desk" points of sale. The scale keeps all the features of CS model, except for the keyboard (65 keys, like PLC model), the weighing specifications and the power supply.

PC Based

**PLC version** is dedicated to all "desk-based" activities. A stylish anodized aluminium bearing and a wide customer display grant the optimal view of all the sales data, promotional information and advertisements. An extended 65 keys keyboard allows the direct selection of PLU.
