We thank our users for choosing a Ditron product.  
For further information and details, please visit the website [www.ditron.eu](http://www.ditron.eu)

The SafeMoney Smart has been specially designed to ensure easy installation, even under the existing counter.  
However, it may be necessary to make some modifications to the workbench in order to access the internal modules and coin chute. This guide also provides the necessary instructions for making such modifications.

For further information on installation and the user manual, please  
access our site

Installation of SafeMoney Easy

Positioning and fixing

The SafeMoney SMART, dimensions and details

Internal view - fixing holes

- SafeMoney Smart is designed for exclusive use in indoor and dry environments. The manufacturer cannot be held responsible in any case for any damages or losses resulting from improper use of the device.
- Incorrect installation of this product, including any inadequate fastening to the work surface, contrary to what is specified in the installation instructions, can lead to accidents and malfunctions.
- It is recommended to secure the case to the supporting surface, and this operation can be carried out with the fixing template (for fixing, remove the rubber feet present on the product).
- Due to the high weight of the product, mechanical assistance is recommended for handling and installation.

- Some desk materials could not be suitable for the SafeMoney installation.
- Check that the case is positioned on a perfectly horizontal base, the inclination of the product can cause malfunctions of the modules.
- Check the desk composition To guarantee the perfect installation, Safe Money must be installed screwing it to the desk using the 4 screws holes.
- Check if the desk is able to support SafeMoney's weight **Empty weight: approximately 37kg**

POSITIONING AND FIXING

For greater safety it is possible to fix the case to the support surface; in this case, we recommend carrying out the operation with the fixing template supplied.

- Remove the rubber feet under the base of the product and use the same holes for fixing.
- Place the template on the surface, it is recommended to block the template with adhesive tape and with the aid of a drill, make the 4 holes for fixing. (F1 to F4)
- Pay particular attention to the direction indicated on the template. (FRONT AND BACK)
- If it is necessary to create a slot for the passage of cables, referring to the position of the "connection panel" indicated on the template.

- Open the front door to gain access to the 4 holes and extract the coin collection box (7) with the appropriate key.
- Using a screwdriver, secure the case using 4 screws. The screws and any plugs are not supplied, their diameter and type depend on the support surface.

For information regarding fixing the internal modules, refer to the complete guide.
